SUMMARY

Pursuing an Honours Bachelor's degree in Software Development (B.Tech, Class of 2028); seeking a Summer 2027 software developer internship/co-op. Codes in Java, JavaScript, Python, and C/C++, with shipped projects across full-stack web apps, Python, and Azure cloud; sharpening data structures, algorithms, and problem solving through coursework and practice while building an ML-powered nutrition app.

EDUCATION

Honours Bachelor of Technology, Software Development

Expected 2028

Seneca Polytechnic, Toronto, ON

- GPA: 3.8/4.0 cumulative (3.95/4.0 in B.Tech semesters) — **President's Honour List** (Summer 2026).
- Computer science coursework: Data Structures & Algorithms, Object-Oriented Programming, Database Systems, Software Testing, System Architecture Design, Web Development, Agile Methodologies.

Diploma, Computer Programming (Graduated with Honours, GPA 3.8/4.0) — Seneca Polytechnic

2021 – 2022

TECHNICAL SKILLS

- **Languages:** Java, JavaScript (Node.js), Python, C/C++, SQL, HTML/CSS
- **Frameworks & Libraries:** React, Next.js, Express, Bootstrap, Pandas
- **Databases & Cloud:** MongoDB, MySQL, Microsoft Azure (VMs, VNets, Load Balancer), Firebase, Vercel, Heroku
- **Tools & Practices:** Git/GitHub, Unix/Linux, Python scripting, REST APIs, Docker, CI/CD (GitHub Actions), Agile/Scrum, Jira, unit & API testing

TECHNICAL PROJECTS

Developer Portfolio & Interactive Web Apps — React, Next.js, Vercel

- Built and deployed my personal portfolio with Next.js on Vercel — the central hub where all my projects can be explored — with responsive layouts, custom animations, and automated deploys from GitHub on every push.
- Tuned for speed: sub-1.5 s page loads (1.3 s Speed Index), zero layout shift, and 96–100 Lighthouse scores for Best Practices and SEO; showcases live demos including a Spotify-style streaming UI and JavaScript games. [Live: portfolio-tarangkumar-patel.vercel.app](https://portfolio-tarangkumar-patel.vercel.app)

Library Catalog App with Authenticated User API — Next.js, Express, MongoDB, JWT

- Built my own Express + MongoDB user service handling registration, JWT login, and per-user saved data, with route guards so only authenticated users reach protected pages.
- Integrated a public library REST API into a Next.js frontend with SWR caching and auth-token handling.

LearnPath — Adaptive Learning Platform — Python

- Fixes what platforms like LinkedIn Learning get wrong: instead of forcing full courses, a placement test maps what the learner already knows, auto-credits mastered topics, and generates a personalized path covering only the gaps.

Azure Cloud Infrastructure & Reliability Lab — Microsoft Azure

- Designed a multi-VM architecture with Virtual Networks, peering, Bastion, and Private DNS; configured an Azure Load Balancer across redundant web servers and managed Active Directory — grounding in infrastructure and reliability at scale.

Bank Management Software — C/C++ (Grade 12 capstone project)

- Replaced a manual accounting workflow with a C++ console app handling account creation, deposits/withdrawals, loans, and record search — my first end-to-end build.

CURRENTLY BUILDING

- **EatFit (in development):** cross-platform nutrition and meal-planning app — React Native + Node.js API, with ML-based meal recommendations on the roadmap.
- **Applied ML, DSA & Project Management:** working through Python ML fundamentals (Pandas, scikit-learn) toward a calorie/macro estimator for EatFit, alongside regular data-structures & algorithms practice and Agile planning of EatFit's roadmap.

EXPERIENCE & VOLUNTEERING

Service Hub Staff & Peer Mentor — Seneca Polytechnic, Toronto, ON

Apr 2026 – Present

- First point of contact at a hub serving 1,000+ students daily in peak periods — collaborating with the hub team to resolve inquiries across fees, registration, advising, and other services, and peer-mentoring students one-on-one.

A/V & Graphics Volunteer — BAPS Canada, Toronto, ON

Jul 2021 – Present

- Run A/V and design event graphics for student sabha gatherings of 100–150 attendees, troubleshooting live.
