PROFESSIONAL SUMMARY

Software Development student pursuing an Honours B.Tech, with hands-on experience building full-stack web applications and RESTful APIs using JavaScript, Node.js, React, and SQL. Comfortable working in agile teams, writing and testing code, and shipping features end to end. Eager to apply strong programming fundamentals and a passion for education technology to a co-op or entry-level Software Developer role.

TECHNICAL SKILLS

Languages: Java, JavaScript, Python, C/C++, SQL, HTML/CSS

Frameworks & Libraries: React, Next.js, Node.js, Express, Bootstrap, Pandas

Databases & Cloud: MongoDB, SQL, Microsoft Azure, Heroku, Vercel, Firebase

Tools & Practices: Git/GitHub, Linux, REST APIs, Agile/Scrum, Software Testing, CI/CD, UI/UX, Jira, Docker, Kubernetes

EDUCATION

Honours Bachelor of Technology in Software Development

Expected 2028

Seneca Polytechnic, Toronto, ON

- Relevant coursework: Data Structures, Object-Oriented Programming, Web Development, Database Systems, Software Testing, Agile Methodologies, and System Architecture Design.

Diploma in Computer Programming

2021 – 2022

Seneca Polytechnic, Toronto, ON

- Built core foundations in algorithms, object-oriented programming, and relational databases.

TECHNICAL PROJECTS

Library Management Platform & REST API Service

Node.js, Express, Bootstrap

- Engineered a full-stack Node.js web service with a responsive Bootstrap frontend for managing catalog data. Designed and tested RESTful API endpoints supporting create, read, update, and delete operations, applying data-exchange standards relevant to system integrations.

Web Hosting Platform

Node.js, Express, MongoDB, SendGrid

- Developed a hosting promotion site using Node.js, Express, Handlebars, and Bootstrap, integrating MongoDB for data persistence. Implemented transactional email delivery via the SendGrid API and deployed the build to Heroku through a GitHub workflow.

Azure Cloud Infrastructure Architecture

Microsoft Azure

- Built a cloud architecture using Azure Virtual Machines, Virtual Networks, Peering, Bastion, Load Balancer, and Private DNS. Configured load balancing across web servers and managed Active Directory Domain Services in a networked environment.

Developer Portfolio & Web Applications

React, Next.js, JavaScript

- Built a high-performance personal portfolio using React and Next.js with custom animations and responsive layouts. Developed additional interactive applications including a Spotify-style streaming interface and logic-based JavaScript games (Simon Says, Calculator).

Bank Management Software

C/C++

- Developed a C++ application to replace a manual accounting workflow, implementing account creation, deposits/withdrawals, loan transactions, and record search.

PROFESSIONAL EXPERIENCE

Service Hub Staff | *Seneca Polytechnic, Toronto, ON*

2026 – Present
